Technical Specifications Self Priming Trailer Mounted Pump set (Qty. 10 Nos.)

GENERAL DESCRIPTION

Self-Priming Pump set mounted on a suitable trailer chassis, which can be towed to the work area by a suitable agricultural tractor.

CHASSIS

Single axle Trailer chassis will be provided onto which the equipment will be mounted. Axle size is 40mm dia./sq. Bar The trailer will have a wide wheel-base and a low center of gravity to ensure optimum road stability in dynamic condition. The unsprung chassis will be manufactured from ISMC 70x35 sections and will be of an all electrically welded construction. The Pump set will be fastened by H.T. nut bolts. The tow bar will be all electrically welded, and fabricated out of two ISA sections. An all forged, spring-loaded steel tow eyebolt of 25mm, and a retractable stand will be fitted onto the tow bar.

TECHNICAL DATA:

Overall Length : 1000 mm (approx.)
Overall width : 600 mm (approx.)
Tyre size : 3 X 50X 8P. R X 2 Nos.

OPERATION:

The self-Priming Pump set for creating Suction and Discharge Of water with Auxiliary Drive System

TECHNICAL DATA:-

System : Self priming pump
Make : Kirloskar/Century/Equivalent
Self priming pump Required for 20 to 25 HP Tractor to drive
RPM : 1450 Or Above

DELIVERY HOSE:-

Delivery Hose Should be 75mm Cotton Canvas hose will be approx. 15 mtrs. long

SUCTION HOSE:

5 mtrs of 75 mm dia, suction Green/sky blue hose, of heavy-duty PVC in one section

DRIVE: The complete unit will be driven by Tractor PTO with propeller shaft knuckle joint and Pulley & 'V' Belt arrangement.

PAINTING:

The Entire Structure shall be spray painted with two coats of superior quality anti-corrosive primer and two coats of enamel metal paint of a reputed make.
